C/FE

GACarver, Jr.

Attached is a batch of Ashau/Actium material to wit: the two cables the Director mentioned at our 28 January session, something marked "DOD submission, rough draft" which makes much more sense than any other scenario. I have labeled this I in order to distinguish it from two other papers the Director handed me (presumably from the 28 January WSAG) which I have labeled II A and II B. Finally (labeled III) there is what purports to be a revision of State's scenario but the changes do not strike me as very significant and it still reads like a script for a tour of Cloud Cuckoo-Land. Will you please return this package for the file when you have finished reading it.

George A. Carver, Jr.
Special Assistant for Vietnamese Affairs
